# CARL WALTHER INTRODUCES THE FIRST OFFICIAL HECKLER & KOCH (H&K) REPLICA

The dedicated .22 long rifle is a new, licensed, economically-priced reproduction available in a HK416 and the famous MP5 Tactical Rimfire. These rifles are high-quality products at a reasonable purchase price made by CARL WALTHER, Germany and a natural succession to our product development.

The new H&K .22 Tactical Rimfire rifles have both metal upper and lower receivers for durability and authenticity. They are available in the MP5 A5 and

MP5 SD6 as well as the HK416 Pistol and HK416 D10RS. Each MP5 model boasts a front sight adjustable for elevation (different posts are included) and rear sight adjustable for windage and elevation for more precise shooting. Additional features, such as the simplicity of the blowback operation, make the firearm easy to operate and enhance reliability. In order to ensure a reliable function the weapons were designed for caliber .22 L.R. H.V. (High Velocity).

### HK416 D10RS

Item No.: 277 29 57

#### TECHNICAL DATA HK416 D10RS

Item-No.	277 29 57
Caliber	.22 L.R. HV
Magazine Capacity	20 (optional 10)
Weight w/o Magazine	2887 g
Overall Length	785 mm
Stock retracted	710 mm
Barrel Length	305 mm
Front Sight	fixed
